Controls larvae of mosquitoes which may transmit Dengue, Chikungunya, or Zika.

To be used in governmental mosquito control programs, by professional pest control
applicants, or in other mosquito control operations.

**Active Ingredient:**
Spinosad (a mixture of Spinosyn A and Spinosyn D) 7.48%

**Other Ingredients:**
Total 100.00%

Contains 0.1 gram Spinosad per extended-release tablet. This product may ab-
sorb moisture; therefore, the weight of the tablet and percent by weight of active
ingredient will vary with hydration.

**U.S. Patent No.** 5,362,634 and 5,496,931

---

### Keep Out Of Reach Of Children

**CAUTION**

**First Aid**

**If in eyes:**
- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center
or doctor, or going for treatment. You may also contact 1-800-214-7753 for emer-
gency medical treatment information.

### Precautionary Statements

**Hazards to Humans and Domestic Animals**

Caution. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear protective eyewear (such as goggles, face shield, or safety glasses). Wash thoroughly
with soap and water after handling and before eating, drinking, chewing gum, using
tobacco or using the toilet.

**Environmental Hazards**

This product is toxic to aquatic invertebrates. Non-target aquatic invertebrates may
be killed in waters where this pesticide is used. Do not contaminate water when
cleaning equipment or disposing of equipment washwaters.

**Directions For Use**

It is a violation of Federal Law to use this product in a manner inconsistent with its
labeling.

Read all Directions for Use carefully before applying.

**NATULAR® DT** is a Naturally® insect product for killing mosquito larvae. This
product’s active ingredient, spinosad, is biologically derived from the fermentation of
Saccharopolyspora spinosa, a naturally occurring soil organism.

**Product Use Precautions**

**Integrated Pest Management (IPM) Programs**

**NATURAL® DT** is intended to kill mosquito larvae. Mosquitoes are best controlled
when an IPM program is followed. Larval control efforts should be managed through
habitat mapping, active adult and larval surveillance, and integrated with other control
strategies such as source reduction, public education programs, harborage or barrier
adult mosquito control applications, and targeted adulticide applications.

**Insecticide Resistance Management (IRM)**

**NATURAL® DT** contains a Group 5 insecticide. Insect biotypes with acquired
resistance to Group 5 insecticides may eventually dominate the insect population

**if appropriate resistance management strategies are not followed. Currently, only
spinetoram and spinosad active ingredients are classified as Group 5 insecticides.
Resistance to other insecticide groups is not likely to impact the effectiveness of
this product. Spinosad may be used in rotation with all other labeled products in a
comprehensive IRM program.

To minimize the potential for resistance development, the following practices are
recommended:

- Base insecticide use on comprehensive IPM and IRM programs.
- Do not use less than the labeled rates.
- Routinely evaluate applications for loss of effectiveness.
- Rotate with other labeled effective mosquito larvicides with different modes of
  action.
- Use insecticides with a different mode of action (different insecticide group) on adult
  mosquitoes so that both larvae and adults are not exposed to products with the
  same mode of action.
- Contact your local extension specialist, technical advisor, and /or Clarke representa-
tive for insecticide resistance management and/or IPM recommendations for the
specific site and resistant pest problems.
- For further information or to report suspected resistance, you may contact your
  local Clarke representative by calling 800-323-5727.

**Application Directions**

**NATURAL® DT** is for use in artificial containers used for water collection to control
the mosquito larvae of container breeding mosquitoes. Artificial water containers
may include drums, storage tanks, jars, roof top catch-
ments, ornamental fish ponds, ornamental pools or fountains, unused swimming
pools, bird baths, gutters, flower pots and urns, water gardens, floor drains, roof
gutters and other water holding receptacles.

Draining or discarding small containers that hold water is the most effective method
for preventing mosquito breeding. To treat artificial water containers that cannot be
drained or discarded, use 1 tablet to treat up to 192 liters (50 gallons).

Reapply after 60 days as needed.

**Restrictions:** Do not apply directly to treated, finished drinking water supply sys-
tems. Do not apply to waters that drain into public waterways.

**Storage and Disposal**

Do not contaminate water, food or feed by storage and disposal.

**Pesticide Storage:** Store in a cool dry place in original container only.

**Pesticide Disposal:** Wastes resulting from the use of this product may be dis-
posed of on site or at an approved waste disposal facility.

**Container Handling:** Nonrefillable container. Do not reuse or refill this container.
Offer for recycling, if available, or dispose of empty container in a sanitary landfill
or by incineration.

**Warranty:** To the extent consistent with applicable law, CLARKE MOSQUITO CON-
TROL PRODUCTS, INC. makes no warranty, express or implied, concerning the use
of this product other than as indicated on the label. Buyer assumes all risk of use/
handling of this material when use and/or handling is contrary to label instructions.
